MEMORANDUM FOR THE RECORD

SUBJECT: Resume of Mission C147C

1. General: Mission C147C (Canned Route 1044) was alerted at the 2000Z, 7 April 1967 Project Headquarters Weather Briefing for 9 April 1967 departure.

25X1

25X1

This mission was primarily designed to obtain high resolution photographic coverage of high priority targets in south China.

Targets: This mission was planned to cover a minimum of 37 COMOR targets of which ten were of the highest priority and eight required data base coverage. The target list included six primary airfields and eight naval complexes.

2. Mission Data as Flown: Penetration of denied territory was made good at the [redacted] at 69,000 feet. The flight proceeded as briefed over China. Exit from denied area was [redacted] Of the COMOR targets planned for coverage, 20 were photographed. In addition, coverage was obtained on 17 other COMOR targets and eight bonus targets. Total targets photographed was 51. Base line coverage was obtained on six COMOR targets. Weather for this mission was very close to that forecast at the Go-No-Go briefing. The weather observed by the pilot and reported on [redacted] was very accurate when compared with the Tracker readout in [redacted] Cloud cover and haze may have affected photographic coverage on portions of three flight lines, but it doesn't appear to have reduced the collection of intelligence information other than in the quality.

7. Photo Quality Analysis:

a. Analysis by [redacted] indicated 5 frames that had double exposure. Small specks of dirt were in several frames. One frame had an emulsion scratch. Some scattered pinholes were detected. The quality evaluation of the film given in [redacted] indicated good in all aspects.

b. The Initial Photo Interpretation Report (IPIR) submitted by [redacted] and the Target Coverage Report submitted by [redacted] through the Intelligence Division indicated that most of the film was of good interpretability. Most of the oblique photos were rated fair by the photo interpreter due to obliquity and in some instances haze or clouds. Some poor ratings were given but again due to obliquity and haze.
